WELCOME FROM THE GENERAL CO-CHAIRS

One of the most rewarding tasks a conference chair has is the pride of becoming, for a few days, an ambassador of his city and having the responsibility and opportunity to repay to his colleagues the many experiences, the knowledge acquired, and the friendships that are the results of his past conference attendance.

The 44th Annual Frontiers in Education (FIE) Conference, as any of the past editions, is special. However, this one stands out for the fact that it is held, for the first time in more than 25 years, outside the United States, thanks to the consideration and trust shown by the sponsoring entities: the IEEE Education Society, the IEEE Computer Society, and the ASEE Educational Research and Methods Division, through the FIE Steering Committee.

What can you expect from Madrid during your visit? Testimonies from attendees to other organized events endorse Madrid as a luminous city, just as Velazquez portrayed it, a result of its multicultural composition, its presentation of history through its museums and monuments, and its modern cutting-edge ambiance. You will feel welcomed by its people, who haven't necessarily been born in Madrid.

In addition, FIE 2014 in Madrid is inspired by this year's theme "Opening Doors to Innovation and Internationalization in Engineering Education." Analogous to the city, we engineering educators search for new roles in the face of the world challenges and necessities which transcend boundaries, by using innovation and generously sharing both resources and educational practices.

This has been the guideline that has led to the participation of more than 500 speakers and that continues a long tradition of disseminating the results of educational innovations and research in engineering and computing. We are thankful for these speakers and the hard and brilliant work performed by the co-chairs of the Program Committee, who have selected and organized the papers submitted: [Monica Cardella](#), ASEE Program Co-Chair; [Russ Meier](#), IEEE Education Society Program Co-Chair; and [Arnold Pears](#), IEEE Computer Society Program Co-Chair. Also to be thanked is the FIE Steering Committee, which by representing the three Societies, has achieved, despite the present situation of global, political and educational crisis, the success of this journey.

Thanks also to the logistic support of Assistant to the General Chairs [Kevin Curry](#), University of Kansas Continuing Education, and to Conference Catalysts, for their work on the computer applications and the web site.

We have to thank our sponsors - the academic host institutions: Universidad Politécnica de Madrid (Madrid Technical University) and Universidad Nacional de Educación a Distancia (Spanish University of Distance Education); our other sponsors: The Madrid Convention Bureau, Hewlett-Packard, Edibon, Mathworks; and our exhibitors.

Madrid will play the role of a hub, a meeting point for professionals from different parts of the world to share ideas and learn about developments in computer science, engineering, and technology education and to interact with colleagues in these fields. Enjoy the history of the city, and the passion with which the artistic and sporting events are experienced. We hope that Madrid will forever find a place in your heart.

WELCOME FROM THE PROGRAM CO-CHAIRS

Dear Colleagues,

It gives us great pleasure to welcome you to Madrid, Spain, and the 2014 Frontiers in Education Conference.

As conference programme co-chairs we have had the stimulating challenge of managing the reviewing, selection, and scheduling of submissions for what promises to be a truly outstanding conference. This year we received close to 900 submissions, from which we have selected approximately 500 for presentation in different formats. The result is a research and innovation packed programme that commences with a day of pre-conference workshops on Wednesday, followed by three full days of presentations, special sessions, mini-workshops, keynotes, and last, but not least, many opportunities over breakfast, lunch and dinner events to meet new friends, renew old acquaintanceships and engage in inspiring debate and discussion.

We have spent a most exciting six months preparing the technical programme. We hope that you enjoy the fruits of our labour, and find the conference as stimulating and interesting to attend, as we have found the process of putting it all together.

Welcome to FIE 2014 in Madrid!

MESSAGE FROM THE FIE STEERING COMMITTEE

¡Bienvenidos a Madrid!

You are attending the 44th annual Frontiers in Education conference and we are happy to see you here! The Steering Committee is especially excited about this conference, as it has been 14 years since the last time FIE was held in Europe. As FIE is one of the premier conferences in engineering education, we look forward to increasing the frequency that FIE is held outside the United States so that we can all better learn from engineering educators from around the world.

FIE is a space where we can be challenged, invigorated and encouraged to think in new ways to facilitate our engineering students' learning. I hope you come away from this conference changed in some way - be it how you see your students, how you see yourself or how you see your institution and its role in educating future engineers.

One of the wonderful aspects of FIE is the community we continue to create and maintain. Over these next few days, I hope you meet some new colleagues and perhaps make a new friend. For those of you that have been coming to FIE for a while, I encourage you to make the extra effort to reach out to those that are new to the conference and make them feel welcome. FIE is a special time and place that we can welcome others to.

Many volunteers, including the Steering Committee work to continually innovate and improve the conference. This year you will notice it is our first year without a physical program. We look forward to hearing your response to this new change that is easier on the planet and our pocketbooks.

Below is the list of all current members on the FIE Steering Committee. You can find us at the conference as we will be wearing Steering Committee ribbons on our conference badges. We represent you and your needs for this conference. Please let us know how to improve FIE.

SPONSORS

Society Sponsors

The **44th Annual Frontiers in Education Conference** is sponsored by the IEEE Education Society, the IEEE Computer Society, and the ASEE Educational Research and Methods Division.

Academic Host Institutions

Universidad Nacional de Educación a Distancia (The National University of Distance Education)

Universidad Nacional de Educación a Distancia (UNED) is a distance learning and research university founded in 1972 and is the only university run by the central government of Spain. UNED is headquartered in Madrid and has centers in all of the Spanish Autonomous Communities as well as in thirteen countries in Europe, the Americas, and Africa. The University awards undergraduate and postgraduate degrees, as well as non-degree qualifications such as diplomas and certificates, or continuing education units. UNED has more than 205,000 students, making it the largest student population in Spain and is one of the largest universities in Europe.

La Universidad Politécnica de Madrid (The Technical University of Madrid)

La Universidad Politécnica de Madrid (UPM) was founded in 1971 by the merging of the higher technical schools of engineering and architecture, most of which originated in the 18th and 19th centuries. According to the annual university ranking conducted by *El Mundo Newspaper*, UPM ranks as the number two university in Spain and as the top technical university. The majority of its engineering schools are consistently ranked as the leaders in their fields in Spain, and among the very best in Europe. UPM is attended by over 44,000 students pursuing undergraduate and postgraduate degrees, as well as those in permanent training.

Reinventing Education in the Internet Age

Speaker: Carlos Delgado Kloos, Universidad Carlos III de Madrid

We find ourselves at a crossroads. In Higher Education, we have to teach young people to work in jobs that don't exist to solve problems we don't know of, with technology that has not yet been developed. There are even problems today that are complex and wicked enough. And this in a context, where the professor cannot be any more the source of all knowledge. On the other side, we are witnessing a commoditization of educational content. Content abounds and becomes richer and more interactive. The Internet and ICT have reinvented the photography, music and news industries. How to reinvent the education industry?

Carlos Delgado Kloos received the Ph.D. degree in Computer Science from the Technische Universität München and in Telecommunications Engineering from the Universidad Politécnica de Madrid. He is Full Professor of Telematics Engineering at the Universidad Carlos III de Madrid, where he is the Director of the GAST research group, Director of the UNESCO Chair on "Scalable Digital Education for All", Director of an online Master program on e-learning, and Vice-Rector of Infrastructures and Environment. He is also the Coordinator of the eMadrid research network on Educational Technology in the Region of Madrid.

His main research interests are in the area of Technology-enhanced Learning. He has been involved in more than 30 projects with European (Esprit, IST, @LIS, eContentPlus), national (Spanish Ministry, Region of Madrid) and bilateral (Spanish-German, Spanish-French) funding. He has published over 200 articles in national and international conferences and journals. He has further written a book and co-edited over a dozen. He is the Spanish representative at IFIP TC3 on Education and Senior Member of IEEE.

Who am I? Who are you? Where are we going?

Speaker: John Heywood, Life member and Fellow ASEE, Life Senior Member IEEE

Dr John Heywood is best known for his IEEE/Wiley publication Engineering Education: Research and Development in Curriculum and Instruction. He has been engaged in R and D in Engineering and Higher Education since 1960 and during that period studied change, been a change agent and an innovator. He is author of Learning, Adaptability and Change: The Challenge for Education and Industry. He has made other contributions to management including a study of engineers at work, and has a particular interest in policy making. He has made a special study of assessment both in high schools and higher education and three editions of his book on Assessment in Higher Education have been published. In engineering he had the privilege to direct the British Astronomical Association's and Radio Society of Great Britain's observations of Sputniks I and II. He is currently interested in the

development of philosophy as applied to engineering education and the development of engineering and technological literacy. He has made many contributions to Frontiers in Education Conferences. John Heywood is a Professorial Fellow Emeritus of Trinity College Dublin in the School of Education of the University of Dublin.

CONFERENCE AMENITIES

Breakfast • Tapices Room

Breakfast is included with hotel registration at the conference hotel. It is separate from your conference registration. However, our conference attendees who are staying at the Meliá Castilla will eat in a separate breakfast room from the other hotel guests so we have more freedom to network. Breakfasts will take place in the Tapices Room. On Thursday and Friday, breakfasts will include plenary presentations.

If you registered for the conference, but do not stay at the Meliá Castilla, you will be responsible for your own breakfast. Nonetheless, you will be able to come to the plenary sessions following the breakfasts on Thursday and Friday.

8:00 a.m. – 10:30 a.m. Thursday Includes Plenary Session

8:00 a.m. – 9:00 a.m. Friday

8:00 a.m. – 9:00 a.m. Saturday

New Faculty Fellows • Exhibit Hall • Patio 2

4:00 p.m. – 5:00 p.m. Friday

A special session focusing on the New Faculty Fellows will be held on Friday. This session will provide an opportunity to meet this year's New Faculty Fellows, a group of new CSET educators who were selected based on an application and a full paper being presented at this year's conference. There will also be an opportunity to view their poster presentations at this time.

Focus on Exhibits • Exhibit Hall • Patio 2

4:00 p.m. – 5:00 p.m. Friday

Visit the FIE exhibits and check out the latest textbooks, computer software, lab equipment, and other innovations while enjoying refreshments.

Awards Banquet • Tapices Room

7:30 p.m. – 9:00 p.m. Friday

This year's awards banquet features fine food, drink, and camaraderie along with presentation of special awards from FIE, the IEEE Education Society, and the IEEE Computer Society. There is a separate charge for the banquet.

FIE Registration Conference Desk • Lobby Level by Patios 1, 2 & 3

Registration will be open during these times:

Wednesday	12:00 p.m. – 8:00 p.m.
Thursday	8:00 a.m. – 6:00 p.m.
Friday	8:00 a.m. – 6:00 p.m.
Saturday	8:00 a.m. – 5:00 p.m.
